

## Preventing damages from harmful particles and chemicals in our present time 8.2.2026

All capsules and extracts are taken from jars and bottles. Extracts can be taken in the same small amount of liquid (water or juice), but resonance drops and Nanokultavesi should be taken separately in a small amount of water. All capsules and extracts should be taken after breakfast and a few hours before bedtime.

It is recommended to take the treatments in numerical order. If a treatment feels too mild, you can also take treatments simultaneously to speed up the overall treatment.

The products can be purchased from the [www.voimalintu.fi](http://www.voimalintu.fi) store, except for Treo pore aspirin, Multivita pore vitamin C, and Nicorette patches, which are available from pharmacies.

### 1. DNA repair, detoxification

- [Resonance drops for detox](#) 1 drop 1-2 x day in water
